Summer Grass Program

Extend your pasture use by supplementing with pasture extender pellets.

-Proven trials that feeding pellets with your grass will impact your rate of gain.

- **Grow replacement stock, calves, grass cattle**
- **Grow pasture capacity**
- **Grow your profit potential!**

Protein levels in the pasture extender pellet range from 11-14% and low enough energy levels which is safe enough to feed in creep feeders!

For more information please contact West Central Pelleting for pricing, options on packages, specs and availability.

So get hooked and get with the program!!
